Next-Generation Notebook Interface

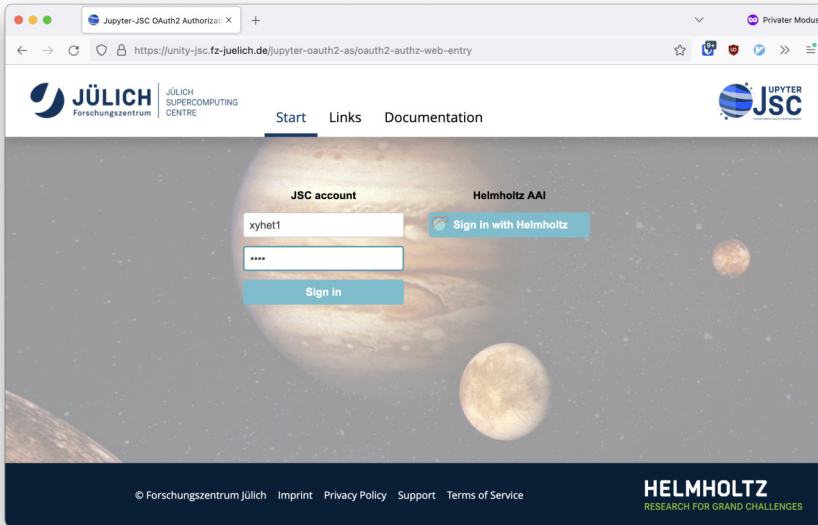

We are pleased to bring "Supercomputing in your browser". Jupyter-JSC gives access to JupyterLab, a web-based interactive development environment for Jupyter notebooks, code, and data. JupyterLab is flexible: configure and arrange the user interface to support a wide range of workflows in data science, scientific computing, and machine learning. JupyterLab is extensible and modular: write plugins that add new components and integrate with existing ones. [Read more.](#)

Please use your JSC account to log in or register if you have not already done so. It's also possible to log in via Helmholtz AAI.

SSH Login

SSH Login

- Login with SSH available
- We recommend Jupyter JSC: easier, more features
- Add SSH key via JuDoor to JUWELS Booster
- **Important:** from clause (limits connections to be from defined sources)
- Example

```
from="140.221.0.0/16,2001:468:1F07::/48" ssh-ed25519 AddddACadsfzaC1lZDI1NTE5AAAAa
```

→ SSH: `ssh user1@juwels-booster.fz-juelich.de`
