# Send join request to project

Do you want to send a project join request to the **training2216** project?

The following information will be given to the PI and PA of the project: Dr. Andreas Herten, **xyhert1**, **an@email.address.com**

Optional additional information for the PI and PA

I'm attending the tutorial on Multi-GPU Computing and am excited to start. LET ME IN ALREADY!

Send join request to project.

## Next-Generation Notebook Interface

We are pleased to bring "Supercomputing in your browser". Jupyter-JSC gives access to JupyterLab, a web-based interactive development environment for Jupyter notebooks, code, and data. JupyterLab is flexible: configure and arrange the user interface to support a wide range of workflows in data science, scientific computing, and machine learning. JupyterLab is extensible and modular: write plugins that add new components and integrate with existing ones. [Read more.](#)

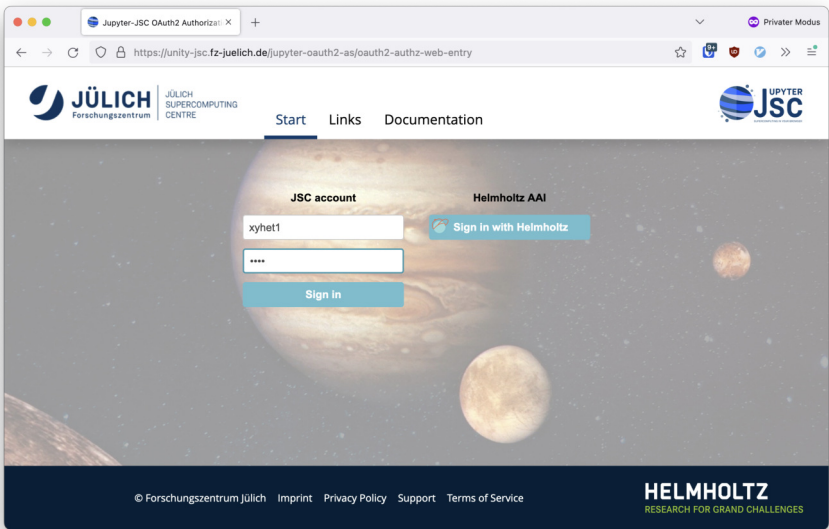

resources. These can be JUWELS, JURECA, JUSUF, HDFML or DEEP's login or compute nodes or even the HDF cloud - depending on the computing resources available to you.

Please use your JSC account to log in or register if you have not already done so. It's also possible to log in via Helmholtz AAI.

Login Register

Jupyter-JSC JUWELS JURECA JUSUF DEEP HDFML HDF-Cloud

The screenshot shows the Jupyter-JSC web interface. At the top, there's a navigation bar with the Jülich Forschungszentrum and Jülich Supercomputing Centre logos, a 'Start' button, and links to 'Links', 'JSC Status', and 'Documentation'. A 'sample-user' dropdown menu is also present. Below this, the 'JupyterLabs' section features a table for configuring existing JupyterLabs. A red arrow points to a '+' icon in the first column of the table, which is labeled 'NEW JUPYTERLAB'. Below the table, a list of available systems is shown: Jupyter-JSC (75 users), JUWELS (83), JURECA (66), JUSUF (5), DEEP (3), and HDFML (1). At the bottom, there's a footer with '© Forschungszentrum Jülich', legal notices, and the Helmholtz Research for Grand Challenges logo.

```
~ via M
10:07:30 > source $PROJECT_training2232/env.sh
The following modules were not unloaded:
(Use "module --force purge" to unload all):

1) Stages/2022

This stage is in construction. Thanks for being an early adopter! If you are
missing some software you'd like to have, please contact support at sc@fz-juelich.de

The following have been reloaded with a version change:
1) Stages/2022 => Stages/2023

*****
Welcome to the SC22 Tutorial on Multi-GPU Computing for Exascale!
Submit a job to the batch system with `JSC_SUBMIT_CMD`
The value of JSC_SUBMIT_CMD is:
srun --partition booster --cpu-bind=sockets --gres=gpu:4 --time 0:10:00 --pty
Some modules have been loaded into the environment. See them with
`module list`.
Synchronize the master material folder to your own by calling
`jsc-material-sync`

# Profiling Tools

- Extra Credits: Prepare for *Profiling Session*
  - Download **Nsight Systems** now; install!
- <https://developer.nvidia.com/nsight-systems/get-started>
- Also: Via package manager [developer.download.nvidia.com/devtools/repos](https://developer.download.nvidia.com/devtools/repos)

# SSH Login

# SSH Login

- Login with SSH available
- We recommend Jupyter JSC: easier, more features
- Add SSH key via JuDoor to JUWELS Booster
- **Important:** from clause (limits connections to be from defined sources)
- Example

```
from="80.146.183.0/24" ssh-ed25519 AddddACadsfzaC1lZDI1NTE5AAAAasa  
# coarser: from="80.144.0.0/13"
```

→ SSH: `ssh user1@juwels-booster.fz-juelich.de`

- Help at [apps.fz-juelich.de/jsc/hps/juwels/access.html](https://apps.fz-juelich.de/jsc/hps/juwels/access.html)

### Upload SSH public keys

To use our systems your public key options have to include a **from=**-clause to restrict the usage of the key to your personal IP address range.

Your current IP address is **46.183.103.8**. See **the documentation** for more information.

☐ Remove all other existing public keys.

Your public key and options string

```
from="46.183.103.8" ssh-ed25519
AddddACadsfzaC1lZDI1NTE5AAAAAsadf5yDS3Sht52425D0gV0AWzu52hnxiIO92Ynksadfijr3bDq
```

Paste the content of your **.pub**-file here or upload a file below.

Your public key file
